

Viva Connections: Dashboard Adaptive Card Implementation

Drive Employee Engagement and Workplace Productivity

The Microsoft Power Platform Centre of Excellence (CoE) is a collection of components and tools that are designed to help fast track your strategy for adopting and supporting Microsoft Power Platform, with a focus on Power Apps, Power Automate, and Power Virtual Agents. Creospark will help you drive the first step in fostering greater creativity and innovation across the organization by empowering business units to digitize and automate their business processes, while maintaining the necessary level of central oversight and governance.

Why Creospark?

With an extensive Microsoft Teams and SharePoint Online modern development practice, Creospark can help you through the process of selecting a use case driving a business vision to your desired state - one that brings people, data, and applications together in a single customized dashboard through Viva Connections. Creospark will help you build a Card that will help people your organization be more productive and more engaged through the Microsoft Teams browser, client or mobile app. Our team will work with you to understand your priorities, challenges, and culture to design a Viva Connections Dashboard card solution that will meet your specific audience's needs.

Get started today with
[Viva Connections](#)

- Evolve your intranet portal into an audience targeted central hub with Dashboard Cards easily accessible on any device powered by Microsoft Teams
- Providing a quick and easily accessible and easy to use Dashboard Card to build a solution that makes your workforce more productive

How Creospark helps you

This offer will help your organization build one fully functioning Dashboard / Adaptive (ACE) Card that fully functions in the Viva Connections Microsoft Teams mobile, desktop or browser apps that fulfills a use case for a specific audience in your organization

Week 1

Week 2

Week 3-4

Prepare your Microsoft 365 tenant and existing SharePoint Online based Intranet for Viva Connections

- Enable Viva Connections in your Microsoft 365 tenant configuration
- Configure your Microsoft Teams App Setup and Permission Policies and target to the right audiences
- Prepare the necessary Azure Active Directory user and group permission for your Viva Connections required capabilities
- Validate and setup the infrastructure requirements for hosting the API needed for target LOB systems to integrate

Unearth your Dashboard Card use case and audience while preparing your LOB web services

- Identify immediate opportunities for audiences in your organization to be more productive and engaged and evaluate based on Impact vs Ease of Implementation
- Leverage the power of Adaptive Card Extensions (ACE) to enable critical LOB Apps, processes and information for Connections-driven employee experiences.
- Plan for a pilot of Viva Connections with a group of business users
- Work with LOB app developers to provide the appropriate API end points and provide the data with the correct format needed for your dashboard card

Enable Connections-driven collaboration across your organization

- Let Creospark work with your team to design out your Dashboard Card user experience from <https://adaptivecards.io>
- Have your development team, work with ours, to implement and test out the new Dashboard Card with the appropriate API in a development environment
- Deploy the Viva Connections Dashboard Card solution in your production environment to the selected pilot audience
- Start planning the adoption, change management and training initiative to help your organization realize the value of your investment in Viva Connections
